Begründungen

0

The text says: "[...] research shows that the cost of insurance policies for young people could rise by as much as 50% over the next two years, reaching up to £3,600 a year." A young driver might therefore soon be paying £3,600 a year.

1

The text says: "[...] The Co-operative Insurance introduced its Young Driver Insurance earlier this year, actively rewarding young people for safe driving [...]." Responsible driving is therefore encouraged by the Young Driver Insurance special policy.

2

The text says: "Their driving score is reviewed every 90 days [...]." The policyholder's driving score is therefore checked at regular intervals.

3

The text says: "More than half of drivers under the age of 25 could save up to £505 on their initial premium, according to independent online research by the UK organization Consumer Intelligence." The author therefore refers to findings by Consumer Intelligence.

4

The text says: "Smartbox [...] collects data about speed, braking, cornering, acceleration and the time of day when the vehicle is being driven." The Smartbox therefore records, apart from the way the car is handled, the time of day when the car is being used.

5

The text says: "The policyholder can also check their 'safer driving score' on their personal user-friendly online driving dashboard." Smartbox users therefore consult their personal online driving dashboard outside the car to get important information.
